PROFESSIONAL SUMMARY

ServiceNow developer with hands-on experience building custom applications, workflow automation, REST API integrations, role-based security, and scripting. Certified ServiceNow System Administrator (CSA) and Application Developer (CAD), with knowledge of Java, JavaScript, SQL, and DSA.

EXPERIENCE

Intern 09/2023 – 10/2023 | Coimbatore, India
- Developed C programming skills to support software development projects.

EDUCATION

Karpagam College Of Engineering 05/2027 | Coimbatore, India
Bachelor of Engineering: Electronics And Communication Engineering

SKILLS

ServiceNow (Business Rules, Client Scripts, Script Includes, GlideRecord, GlideSystem, GlideAjax, Flow Designer, ACLs, UI Policies, UI Actions, Notifications, SLA) | **Integration** (REST API Integration, RESTMessageV2, JSON, HTTP/GET, Dynamic REST Parameters) | **Programming** (Java, JavaScript, SQL)

CERTIFICATIONS

ServiceNow Certified System Administrator (CSA) | **ServiceNow Certified Application Developer (CAD)** | **Education for Sustainable Development (NPTEL)** | **Soft Skills (NPTEL)**

ACCOMPLISHMENTS

- Presented a research paper at ICIRIST 2026 International Conference.
- Participated in National Level Technical Symposium "DECIBERTZ 26".

PROJECTS

College Management System | ServiceNow

- Developed a custom ServiceNow application to automate college administrative processes.
- Implemented workflow automation, role-based security, notifications, and SLA management using ServiceNow platform features.
- Utilized Business Rules, Client Scripts, Flow Designer, ACLs, GlideRecord, and GlideSystem for application development and customization.

IP Geolocation API Integration | ServiceNow

- Integrated an external REST API with ServiceNow using RESTMessageV2.
- Used dynamic parameters and JSON parsing to fetch and populate IP-based location details such as country, city, latitude, longitude, and timezone.

Current Weather App | ServiceNow

- Developed a ServiceNow application to retrieve current weather data based on city using RESTMessageV2, Business Rules, and dynamic REST parameters.
- Parsed JSON responses and mapped API data such as temperature, humidity, wind speed, pressure, visibility, sunrise, sunset, latitude, and longitude to ServiceNow fields.
- Implemented outbound REST API integration to connect ServiceNow with an external weather service and dynamically update weather information.
